ABOUT ME

MERN Stack Developer with experience building scalable, responsive web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in developing RESTful APIs, JWT-based authentication, and database management with MongoDB & Mongoose. Strong in JavaScript (ES6+), backend architecture, performance optimization, and modern development tools like Git/GitHub and Postman. Passionate about writing clean, maintainable code, quickly adapting to new technologies, and delivering efficient, high-quality solutions in collaborative environments.

PROJECTS

personal portfolio

- Built a responsive personal portfolio using React with reusable components.
- Designed a clean, interactive UI with smooth navigation and animations.
- Showcased projects, skills using modern React practices.
- Optimized performance and ensured cross-device compatibility.

bus booking website

- Fully responsive user interface optimized for mobile, tablet, and desktop devices using modern tailwind CSS and flexible layouts.
- Real-time bus search and seat availability powered by a MERN stack (MongoDB, Express, React, Node.js).
- User authentication and secure booking flow, including login, seat selection, and booking confirmation.
- Intuitive and fast UI experience with reusable React components and optimized API integration.
- Live demo: <https://anees-al.github.io/busbooking/>

Billing Software

- Developed a full-stack Billing Software using the MERN stack (MongoDB, Express.js, React, Node.js) to manage products, customers, and invoices efficiently.
 - Implemented product and inventory management, enabling real-time stock updates after billing and reducing manual tracking errors.
 - Live demo: <https://anees-al.github.io/billing-software/>
-

EDUCATION

Diploma in mechanical engineering

2020-2023

central polytechnic collage Trivandrum(course not completed)

SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database Management System:** MongoDB
- **State Management:** Context API, Zustand
- **Real-time:** Socket.io
- **Tools:** Git, GitHub, Postman
- **Testing:** Vitest (Unit Testing)
- **Other:** Responsive Design, API Integration
